

SMART!Hazard Manager

- Is an affordable tool that can engage everyone, anywhere, all the time, to be involved in your safety process.
- Is simple to use from any smart phone, iPad, and/or PC.
- Instantly show and measure the safety improvements that have been accomplished in each area, department, and site.
- Establish realistic goals for supervisors, departments, and sites that can only be obtained by actual measurable reduction in hazards in their area.
- No more relying on OSHA Recordables - Dart Rates - Workers' Comp Cost or other rear view mirror indicators!
- Instantly have a key component of a Safety Management System – rather it be VPP, I2P2, ISO, ANSI, or OHSAS .
- Continuous improvements forever!

Hazard Assessments Missouri

Ergonomic Solutions That Pay!

All Smart Ergonomic Solutions Improve Productivity!

Let us show you how to put smart processes into place to continuously address your ergonomic issues and drive your number of musculoskeletal injuries to zero!

The Process:

- Educate - train enough folks in your organization so that you have the knowledge on how to continuously address the ergo issues as they come up.
- Organize - set up a process so that you continuously address the resource needs at the correct stage of the process.
- Execute - Don't settle! Address the issues. Change the behaviors. Design out future problems.

Safety & Health Consulting

SimplySMART!Safety is changing the way many companies address safety.

SimplySMART!Safety is an innovative yet practical safety consulting company that always strives to provide you with greater value than you were expecting!

Conduct high-impact training on topics such as Safety Cultural Change (Behavior Based Safety), Ergonomics, OSHA Compliance (Authorized OSHA 10 & 30 Trainer), Safety Committees, Self Assessments, Supervisor Involvement, and many other options.

Conduct assessments, address machine guarding issues, review pallet rack safety issues, develop Lockout/Tagout procedures, write Job Safety Analyses (JSAs), or assist with most any of your safety needs.

We efficiently guide you to dramatic improvements in your safety program!

We can help bring your program into OSHA compliance AND improve productivity at the same time!

Industrial Hygiene

Our team can carefully address most noise, air quality, and ergonomic needs. Quick turnarounds are always available when necessary.

INDUSTRIAL HYGIENE SERVICES

Air and noise monitoring, needs assessments, and solutions are developed by a licensed Certified Industrial Hygienist (CIH) with a broad engineering background to not only measure your exposures but also to assist in developing strategies to minimize them. Other services such as ergonomic workstation reviews, Job Safety Analyses (JSAs), or development of Lockout/Tagout training or procedure writing can be accomplished at the same time as sampling to dramatically stretch your safety budget. Conduct high impact training on topics such as Safety Cultural Change (Behavior Based Safety), Ergonomics, OSHA Compliance (Authorized OSHA 10 & 30 Trainer), Safety Committees, Self Assessments, Supervisor Involvement, and many others.

We efficiently guide you to dramatic improvements in your safety program! We can help bring your program into OSHA compliance AND improve productivity at the same time!

Pallet Rack Safety

**Are your racking systems safe?
Do you know how to determine when damaged
racking needs to be addressed?
How do you really conduct a practical inspection?**

Top indications that your pallet rack storage systems may not be safe :

- You have an area in one of your facilities with some significantly damaged racking.
- There is confusion on what “significantly damaged racking” really means.
- You've had a rack component or product fall within the past year (and you may not have been notified).
- You rely on department supervisors for rack safety and they have not asked you for any assistance in the past year.

**ANY OF THESE INDICATE THAT YOU COULD HAVE A PROBLEM THAT
COULD ULTIMATELY LEAD TO A SERIOUS ACCIDENT!**

Our team of Professional Engineers can assist you!
